ABOUT ME

My name is Karoly, I'm a Frontend Web Developer. Originally, I'm a mechanical engineer with BSc degree, but I have changed my career to become web developer. My main strength is the **responsive design** using **ReactJS, JavaScript, HTML, CSS** and **SASS**, but I can work at the back-end with **NodeJS, MongoDB, AWS** and **Django**, too. I'm a good team player and enjoy working as a member of a team, also, I can dive deep into a task on my own and not panicking if I need to find the solution to something I haven't seen before.

I have built websites and web applications, used both front-end and back-end technologies and I'm ready to become a member of a developer team. I'm looking for a junior frontend web developer position where I can work in a developer team and extend my knowledge.

WORK EXPERIENCE

Web Development Experience:

- [Sparkling Willow Photography](#)
- [Mary's Workshop](#)
- Photo sender/saver web app, used technologies **JavaScript, NodeJS, AWS, HTML, CSS**
